DETAILED ACTION

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action or the MPEP.

Claim Rejections - 35 USC § 112

Claim 2 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 2 is rejected because it reads like a method claim. To correct, applicant could change line 2 of claim 2, and insert –are adapted to— after “layers”. This would modify the structure of the layers so that it could perform the claimed function.

Claim Rejections - 35 USC § 102

Claims 1, 3-10, 15-17 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Becker et al., US 6,652,568. See especially column 4, lines 61-63, which discloses the longitudinal stripes. Regarding the location of the stripes, see column 3, lines 10-19, which states that the radiopaque portion may be on the inner wall or between layers of the balloon.

Claim Rejections - 35 USC § 103

Claims 11-14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Becker et al., US 6,652,568. Regarding claims 11 and 12, it would be obvious to the

ordinary person to use other or additional imageable agents given the wide variety of diagnostic imaging devices available to the surgeon today. Regarding claims 13-14, applicant cites a minimum spacing which is probably contemplated by Becker or would be at least obvious in view of the disclosure at column 3, lines 10-19 which states that various arrangements of layering are operable in the invention. If applicant put an upper range on the spacing, that feature would be patentable since Becker does not contemplate the folding. Thus, the spacing range could be considered a critical feature, and not merely obvious under MPEP 2144.04 IV.

Allowable Subject Matter

Claim 2 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

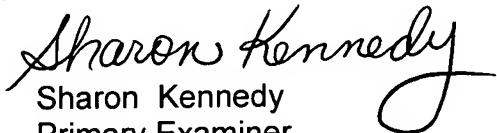

The following is a statement of reasons for the indication of allowable subject matter: Although Becker discloses longitudinal stripes, there is no disclosure or suggestion to position the stripes in such a manner that would permit balloon folding.
